QUARTERLY ACTIVITIES REPORT to September 30, 2015

REVIEW of OPERATIONS GUNNEDAH BASIN COALBED METHANE PROJECT PETROLEUM EXPLORATION LICENCES 1 AND 12, NSW (GUNNEDAH BASIN)

(These tenements are held by wholly owned subsidiary, Australian Coalbed Methane Pty Ltd (ACM) and are subject to a Joint Venture (JV) with Santos QNT Pty Ltd (Santos), as previously advised. Santos holds a 65% interest in the tenements and is the project Operator.)

During the quarter field operations remained limited to routine well maintenance. The Operator advises that the EPA (NSW Environmental Protection Authority) has undertaken a leak detection survey of the JV wells at Kahlua and reported no leakage. Non-field activities included Santos representation at the NSW Farmers Conference and the annual information tent at Gunnedah AgQuip, the nation's biggest agricultural event.

PEL1 remains under renewal application and in May 2015 the Government implemented a **Minimum Standards and Merit Assessment Procedure** for PEL renewals.ⁱ The JV is currently finalising the additional documentation now required by these new Minimum Standards in relation to the PEL1 renewal.

On 1 July the NSW government also introduced the **Improved Management of Exploration Regulation** (IMER) across all facets of the NSW exploration industry, viz. minerals, coal and petroleum. This system is designed to provide a more consistent and streamlined regulatory and reporting environment. The system covers all work related to exploration including prospecting and assessment operations, environmental and rehabilitation work and community consultation activities. Further details are available from the NSW Resources & Energy website.ⁱⁱ

Also in July the Government released an **Exploration Guideline for Petroleum Land Access** to assist both landowners and explorers in land access negotiationsⁱⁱⁱ.
